

HOME IMPROVEMENT PROGRAM

HIGH EFFICIENCY TOILET

HOW IT WORKS

Toilets are by far the main source of water use in the home, accounting for nearly 30 percent of an average home's indoor water consumption.

Toilets with a gallons per flush (gpf) rate higher than 1.6 are eligible to be replaced with a 1.28 gpf toilet. Replacing your high-water use toilet with a high efficient WaterSense labeled model can reduce the water used for toilets by 20 to 60 percent. That's nearly 13,000 gallons of water savings for your home every year.

WHAT TO EXPECT

- The specialist will determine if you have a high water use toilet eligible for replacement.
- Your referral information will be forwarded to our plumbing contractor, VHL Plumbing.
- Two appointments may be needed in order to complete this measure.
