

# HOME IMPROVEMENT PROGRAM

## HIGH EFFICIENCY TOILET

### HOW IT WORKS

Toilets are by far the main source of water use in the home, accounting for nearly 30 percent of an average home's indoor water consumption.

Toilets with a gallons per flush (gpf) rate higher than 1.6 are eligible to be replaced with a 1 or 0.8 gpf toilet. Replacing your high-water use toilet with a high efficient WaterSense labeled model can reduce the water used for toilets by 30 to 50 percent. That's nearly 13,000 gallons of water savings for your home every year.

### WHAT TO EXPECT

- The specialist will determine if you have a high water use toilet eligible for replacement.
- Two appointments may be needed in order to complete this measure.
