## Demand Charge

BWP categorizes its commercial accounts by Electric Service Classifications: **Small, Medium, Large, and Extra Large General Service.**

These categories are based on the peak demand. Peak demand is the highest demand that has occurred over a set period of time on your account. This is measured in **kilovolt Amperes (kVA)** and is billed under “Demand Charge.”

The chart below will help you identify which electric services classification your account is based on the kVA displayed next to your Demand Charge.

In the example to the left, the kVA is 25.584 and is a Medium General Service account.

Electric Service Classification	kVA
Medium	20—250
Large	250—1,000
Extra Large	1,000+

**This is a sample bill.** Your bill may only have some of the services shown.

## Small General Service

If you do not see a Demand Charge on your bill, that means that you have a peak demand less than 20 kVA. Your account is classified as Small General Service.
