UNDERGROUND CONSTRUCTION PROJECT

DEAR VALUED CUSTOMER

BWP will be constructing underground electrical infrastructure necessary to serve the replacement Burbank Airport Terminal Project. BWP's contractor Doty Bros. Inc (Doty) will be performing the work. There will be temporary lane restrictions beginning in September, 2024 in each section that Doty will be working.

TEMPORARY LANE RESTRICTIONS START IN SEPTEMBER

Customers will see "no parking" signs posted by Doty as needed. Please see the reverse for a map of the affected areas and hours for construction below:

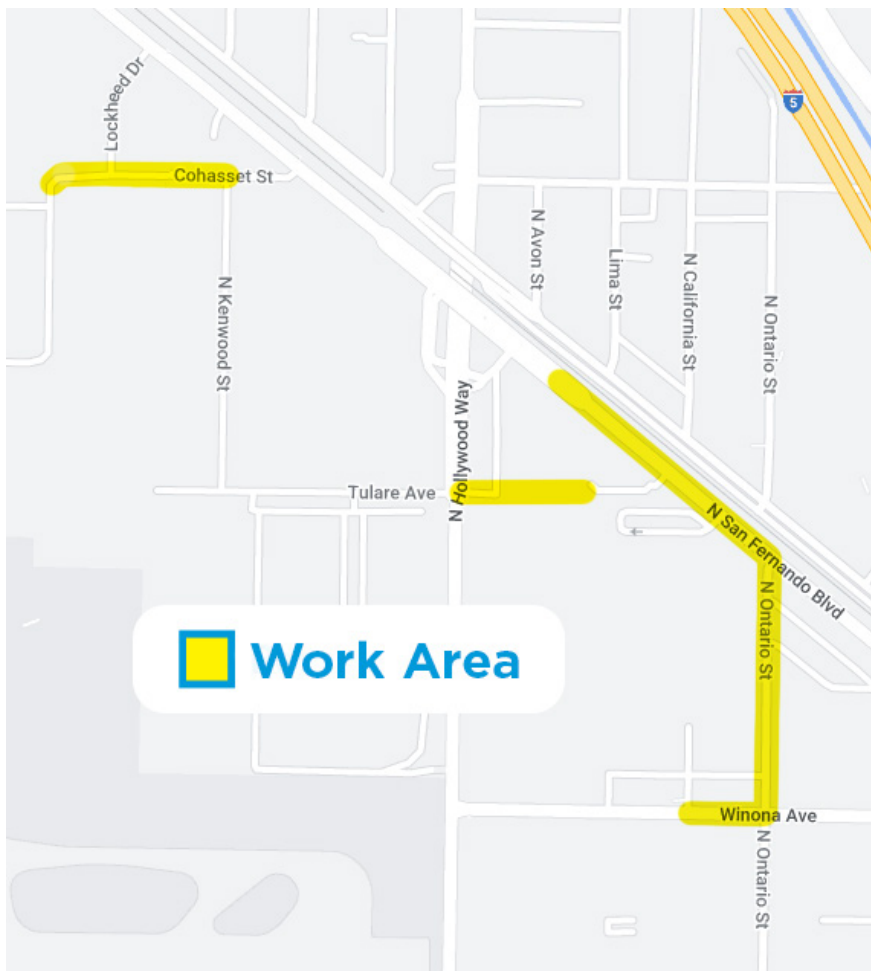

MONDAY - FRIDAY

**SAN FERNANDO BLVD:
8:30AM TO 3:30PM**

**ALL OTHER STREETS:
7:00AM TO 4:00PM**

Here's What You Need to Know

The Underground Construction Project will involve repaving trench cuts in the street using grinding, milling, and paving machines, street sweepers, and material transfer vehicles.

Crews may begin the project at multiple points along highlighted streets on this map.

A Carefully Developed, City Approved Traffic Plan Will be Used

The plan will help keep traffic flowing around the construction area. Informative signs, traffic cones and traffic guards will be used as necessary to minimize the day-to-day impact. Speeds will be reduced in the area of construction.

As work progresses, “No Parking” signs will be placed around the area of construction to assist with traffic flow. These signs will be posted a minimum of 48 hours in advance.

Keeping the Area Clean is a Priority

Our contractor will use necessary dust control and street cleanup as needed to keep the job site and the City streets clean.

Noise May be Heard During the Construction Working Hours

This type of construction requires the use of heavy machinery, which can be noisy. We understand this may be a concern and will do our best to limit this noise to the construction working hours.

Generally BWP Does Not Need Access to Your Property except around Tulare Avenue

Our work will mainly take place in the street. If access to your property is needed for any reason, our crews will coordinate access in advance. Access to your driveway may be temporarily blocked for short durations. When this happens, you will be notified and work will not begin until scheduling is coordinated with you.

Questions?

If you have additional questions, please contact the BWP Project Manager, **Jessica Chen**, at **(818) 238-3549** or **jchen@burbankca.gov**.
